FSB™ is a light pre-engineered building solution developed by PT Robertson FastBuild Indonesia for the Indonesian market. The development of FSB™ is fully supported by engineers and IT specialists from Metroll, a leading steel building material and solution business in Australia. Metroll has been developing the system for the last ten years and has received remarkable acceptance from Australian customers

The backbone of FSB™ system is its specialized software, used to design steel building to meet specific customer requirements, prepare quotations, issue bill of material for production, and produce complete set of drawings for engineering purposes and erection of the building. All building components are manufactured in-house by PT Robertson FastBuild Indonesia using the latest technology for automatic data transfer to the production equipment

The FSB™ range of solutions is suitable for:

- Factories
- Warehouses
- Workshops
- Facility Buildings
- Residential Garages
- Sport Halls
- Offices
- Sheds
- Modular Buildings
- Modular Houses

COST REDUCTION

Reduce total construction cost to up to 30%

FASTER CONSTRUCTION

All components and sections are pre-numbered and pre-punched for easy installation

SINGLE POINT OF CONTACT

From design to manufacturing and site installation by certified installer

ADHERENCE TO STANDARD

Adherence to both Indonesian and Australian Building Codes

ENGINEERING SUPPORT

Every design will be verified by certified engineers to ensure it is structurally sound

Design flexibility to meet end-user needs

- Up to 27 m span
- 5° to 25° roof pitch
- No welding
- No painting
- No maintenance

Minggu tetap buka

Tahukah Anda:
Orang yang mengalami kehilangan
gigi (walaupun hanya satu gigi
ompong), jika dibiarkan terus akan
terlihat lebih tua dari usia sebenarnya.
Hal ini dikarenakan tulang
rahang pada lokasi gigi yang
hilang akan mengalami aus
dan tidak lagi dapat menahan
pipi dan bibir.

**APAKAH ANDA
MENGALAMI
KETIDAKNYAMANAN
KARENA
GIGI OMPONG
GIGI PALSU**
